product description

Design Christoph Matthias 2014

Three aluminium balls, precisely adjustable.

Three colours, red, green and blue. Combined, a clear white light is created.

If this falls on an object, the white light creates colourful shadows.

A magical moment!

The heaviness of the spheres is combined with the floating lightness of the play of colour and shadow.

Dimensions: balls ø 50 mm

cable length: 1,5 m

enclosed

Archie B. with plug-in power supply

Three rubber rings

technical data

230 V ~ 50 Hz

3 x LED 1 W, (red, green, blue)

secondary max. 350 mA

Type:

interior light IP20

This light contains built-in LED lamps.
Energy classes: A - A ++
The lamps only can be exchanged by the manufacturer.

safety note

Follow always the hints of this instruction for a safe assembly and use of these lights. Keep the assembly instruction for further questions.

The assembly and the electric supply must be done by an electric professional. Local installation regulations have to be respected.

The manufacturer accepts no liability for any damage due to improper use of the luminaire.

Attention! Before working on the luminaire disconnect it from the mains. Also for cleaning, maintenance and lamp change.

Luminaires are only allowed to be used for the specified purpose. Interior lights may not be used in outside area. Luminaires may not be covered. They may not be connected to power supply still they are packaged. Lights with electronic control gears (ECG) have to be operated with original ECGs.

The lamp change must be done by a competent professional.

Use only lamps with same type of construction, performance and voltage.

In case of damages, in particular of cable and socket, the luminaire has to be shut off immediately. In case of damage on the mains cable it has to be changed by the Lichtlauf GmbH.

For malfunction call authorized personnel for troubleshooting. Never repair it by yourself.

Through improper repair work may arise risk for the user.

Elements of plug and connection shall be free from traction and torque.

care instructions

Disconnect the device from the power supply grid before cleaning.

The care of the lamp is limited to the surfaces. Make sure no liquid reaches the connection area or electrical components.

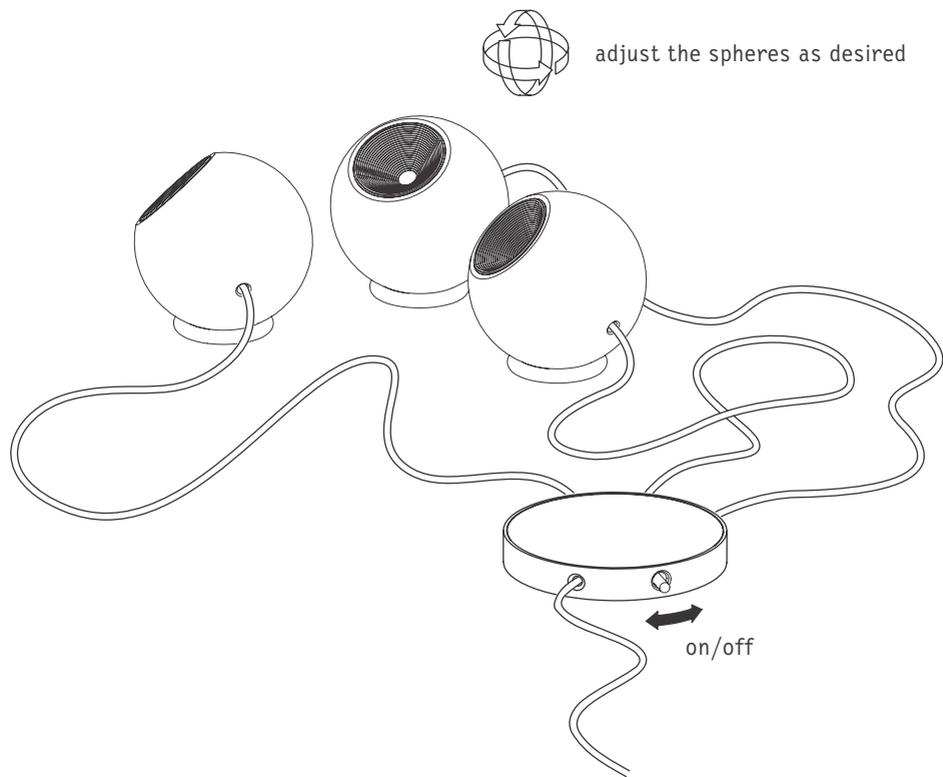

Important:
Please don't use spiritus or alcohol containing products.
As well as no abrasives or abrasive containing detergents.

Only use a damp cloth to clean the lamp.

special notes

Archie B. is not a toy for children! Keep plastic bags and small components away from children to avoid risks of suffocation or swallowing!

Do not look directly into the light source! (risk of glare or eye damage)

starting up

Place the spheres on the enclosed rubber rings and to adjust them as desired. This prevents the spheres to roll away and ensures the orientation.

Plug the power supply in a nearby socket. At the junction box is the on/off-switch.

effect tips

Adjust the spheres so that you get an extensive white light on an illuminated surface (for example a wall or ceiling).

At the edges it could well be more colored. Place a object between spheres and surface and let yourself be surprised by the colored shadows.

Just experiment!
